

SECTION: NURSING SERVICES

POLICY: #439 INFLUENZA IMMUNIZATION

Central Valley Health District will offer and administer Influenza immunizations within the guidelines of the CDC and NDDoH.

Types of Influenza Vaccine Available:

Inactivated Influenza Vaccine: Flu shot

Private Stock is available to clients 6months of age and older and is administered intramuscularly (IM). There is a set fee for the administration of this serum and insurance will be filed for BC/BS policyholders.

VFC serum: will be available to children 6months of age -18 years of age meeting the VFC guidelines for administration. A suggested donation for administration is requested, but no one is denied immunization due to inability to donate. This may also be expanded under special circumstances.

Live, Intranasal Influenza Vaccine: FluMist

Private Stock is available to persons **2years thru 49 years of age** who meet the guidelines as indicated by the CDC and NDDoH. There is a set fee for the immunization and insurance is filed for BC/BS policyholders.

VFC serum: will be available to persons 2 years thru 18 years of age that meet the VFC guidelines for administration. A suggested donation for administration is requested, but no one is denied immunization due to the inability to donate.
